Import comments directly from PDFs, Word files, PowerPoint slides, and other popular word processors without additional steps and without the need to open the source file. Markup Assist is a powerful tool to help you efficiently add text, symbols, or drawings directly from your Microsoft Word, PowerPoint, or Microsoft Excel files and merge them into your drawings. Allowing you to work with the most common file types, the functionality of AutoCAD has advanced beyond anything previous releases have offered. All of this automation and efficiency is just a click away with the help of Markup Assist. Outline level text: Speed up text input by changing the autofill behavior of letters and digits. The most common type of text (numbers, letters, punctuation) is considered to be a single entity. Previously, Autodesk recognized each character as separate entities, making auto-fill of text more time-consuming. By default, in Markup Assist, all text is treated as a single entity. This new behavior significantly reduces the number of steps needed to input text, saving you time. CAD Object Map: The CAD Object Map has been redesigned, making it easier to find and interact with shared design objects. The interactive map displays design elements like labels and line symbols within your design. A click or touch on an element displays an expanded list of all the elements. Now when you double-click on a line symbol or label, it jumps directly to that element, enabling you to view your whole design at once. Ribbon & Toolbar: Intelligent Ribbon Context: The ribbon design has been completely re-thought, streamlining all the ribbon functionality into one easy-to-use and intuitive tool. All the ribbon controls are contextually aware, so they appear only where you need them. The ribbon design is more visual and intuitive, displaying only the tool you need at a time. And the color palette now reflects the current tool being used, making it easy to find the right ribbon. One quick-access button, Quick Access toolbar, now provides easy access to all the essential design tools, allowing you to build drawing at your desk. And the Task Panel, with its new design, now gives you a place to quickly organize your most commonly used commands and tools. Ribbon: The ribbon now provides a more direct way to access features from the command bar or from
