In FIFA 22, we've also introduced the FUT Draft, FUT Draft Stadiums, improvements to the FIFA Ultimate Team Squad Builder, and more. Read on for a closer look at these gameplay changes, and join us next week for a look at some of the tactical changes and other new features available in FIFA 22. FUT Draft Collective Experience Collective experience is a new stat in FIFA Ultimate Team that gives you full experience for your FUT Drafts - each player you draft is worth full experience. This unlocks new potential for gameplay depth and invites players to take on more players to help improve their teams. Draft & Choose FIFA 22 now allows you to save draft lists and choose players from your retained squad to play them in your next game without losing any of the progress you've made. You'll also have the ability to swap players back and forth between your retained and draft squads to find the best of both squads. A new transfer window interface has been added which allows you to see the status of your transfer requests and the amount of available credit for them. Draft List Selecting players from your retained squad no longer removes them from your draft list. You can select players for your draft list which you would want to retain in your current FIFA Ultimate Team squad. Selecting retained players will now display the remaining teams credit for that player in the team draft window. You can also automatically save your draft list. New Player of the Month In FIFA Ultimate Team, each month you'll be rewarded for your achievements, with a new Player of the Month. You'll be awarded 12,000 experience for your squad once you've reached the top-rating of your position within your team. It can be the best or worst player in your team, in any position, as long as you play with all members of your team, regardless of the historical rating of your team. Player Rating Changes Ever wondered why players perform better or worse in certain situations? The introduction of Team, Position and Team Rating gives you an insight into that. For example, on an open-play goal, Player A's Team Rating will be less than Player B's. When it comes to attacking down the left side, Player A's Team Rating will be higher than Player B's. Team
