I think we need some name changes, but that's a different conversation :) Radioimmunoassay of oxalate-creatinine in urine. An improved radioimmunoassay for oxalate-creatinine in urine was developed. The procedure is based on an indirect antigen-antibody reaction using 99mTc-labelled oxalate-creatinine conjugate and the antibody raised in rabbits. Analyses of standard solutions, urine, and dialysed urine showed a minimum detectable concentration of 0.20 mumol/l oxalate and 0.50 mumol/l creatinine, and a limit of quantification of 0.6 mumol/l oxalate and 1.5 mumol/l creatinine. Urine samples (n = 200) from healthy individuals and from patients with oxalate-creatinine calculi and idiopathic renal calcium stone disease were analysed for oxalate-creatinine. The mean levels (median) were 0.40 (0.36), 0.39 (0.34), and 0.50 (0.52) mumol/l oxalate and 0.30 (0.23), 0.34 (0.25), and 0.30 (0.20) mumol/l creatinine, respectively. In a strange bit of news, i was recently confirmed that the legendary motorcycle racer Sammy \*Yates\* would be making his return to the world of racing, with the unveiling of his brand new racer, named the \*Yates Beast\* at this year's Bonneville Speed Week in \*Ohio\*. This beast will be the first race-inspired bike to take to the track since the impressive \*Yates Superbikes\* that you will see if you compare their design to the images in this article. The bike was first spotted during the week it was released at the \*Yates Dealer Showroom\* and it's even been confirmed that other Yates bikes will be on display at the Bonneville exhibition hall, although it's not clear yet if any of these will be the same... Hopefully though! So if you want to admire the luxury display case that will be housing the Yates Beast, just follow this small gallery down to the bottom of the page. Thanks to Silvio from Yates for the tip! CellSearch: a review of the first 10 years of
